

```
class Student {  
    private:  
        int size;  
        int* grades;  
    public:  
        Student(int s) {  
            size = s;  
            grades = new int[size];  
        }  
};  
  
int main(void) {  
    Student s(3);  
    return 0;  
}
```
